EDUCATION

Bachelor of Science in Computer Science

June 2028

Minor in Business Information Systems

Oregon State University, College of Engineering

Corvallis, Oregon

EXPERIENCE & LEADERSHIP

ASSOCIATIONS: Project Officer, Artificial Intelligence Club, Member: Association of Computing Machinery (ACM)

Web Developer Intern, Impact Studio (*Oregon State University*)

May 2026 - Present

- Improved Impact Studio's web experience by leading a full-site redesign that simplifies navigation, clarifies its mission, and better showcases initiatives.
- Resolved design and technical trade-offs by finding feasible alternatives that preserve the intended user experience.
- Coordinated 5 cross-functional interns, turning weekly stakeholder feedback into design and development priorities.

Project Lead, Design for America (*Oregon State University*)

January 2026 - June 2026

- Led an 11-person team redesigning access to critical services for a nonprofit serving people experiencing homelessness.
- Tailored UX for distinct audiences by prioritizing trust and accessibility for service users and credibility for donors.
- Translated 50+ nontechnical stakeholder needs and UX findings into prioritized design and development requirements.

Co-Founder, Startup Hub (*Oregon State University*)

June 2025 - Present

- Connected 30+ aspiring founders across engineering and business by building a community around startup resources.
- Earned a returning InventOR partnership by coordinating a student startup and prototyping competition.
- Expanded founder programming and access to startup leaders through recurring pitch nights and speaker events.

VP Outreach, College of Engineering Student Council (*Oregon State University*)

June 2025 - Present

- Strengthened student representation in college decisions by bringing feedback from 10K+ engineering students and connecting 50+ organizations with faculty and resources.
- Allocated \$200K+ in funding by evaluating club financials, membership data, and competing requests.
- Increased attendance 40% across 10+ events through targeted marketing, outreach, and programming.

Executive, BeaverHacks (*Oregon State University*)

June 2025 - Present

- Coordinated cross-functional execution for Oregon's largest hackathon, supporting 481 participants across logistics, marketing, and operations.
- Drove marketing campaigns that reached 350K+ views using promotional content, merchandise, and campus outreach.
- Addressed funding constraints through sponsor outreach and budget-conscious planning for a nearly \$50K event.

PROJECTS

ER Overwatch (Hackathon, 1st Place) - (*Project Link:* bit.ly/ER-Overwatch)

- Built an AI monitoring platform for overcrowded ER waiting rooms that detects patient falls and tracks deterioration through contactless vital sensing.
- Streamlined patient intake with an AI assistant that gathers symptoms, generates case files, and updates nurses.
- Validated contactless heart-rate monitoring at 88%+ BPM accuracy using rPPG and computer vision.

ComboCraft (Hackathon, 1st Place) - (*Project Link:* bit.ly/combocraft)

- Built a browser-based motion combat game that turns webcam-detected gestures into real-time attacks without specialized hardware.
- Designed gameplay systems across three difficulty levels, multi-stage bosses, gesture combos, and resource mechanics.
- Achieved 95%+ gesture recognition accuracy and smooth 60 FPS gameplay through custom computer vision pipeline.

SKILLS

TECHNICAL: Python, C++, JavaScript, TypeScript, SQL, HTML/CSS, React, Node.js, REST APIs, Git

PRODUCT & DESIGN: Figma, UI/UX Design, User Research, Requirements Gathering, Stakeholder Management, Cross-Functional Leadership, Project Management

TOOLS: Drupal, WordPress, Canva, GitHub
